ACHIEVEMENTS

3rd prize winner at National School Olympiad in Programming.

1st prize winner of Programming contests at the Georgian Technical University.

Delivered presentations on Cyber Security to a large audience.

LANGUAGES

Georgian, English, Russian

EDUCATION

Schiller International University, USA
Management of Information Technology, MBA
2008 - 2009

Georgian Technical University, Georgia
Systems Management and Programming Concepts, Bachelor
2003 - 2007

Customs Academy, Georgia
Public Law, Bachelor
2003 - 2007

Private Demirel College, Georgia
College Degree
2003 - 2007

SUMMARY OF QUALIFICATIONS

Pascal

Experience: 4 years

I have studied Pascal at high school for 2 years which helped me master this language and build the foundation to learn other more complicated languages.

C++

Experience: 6 years

By studying and using C++ programming languages, I have learned the fundamentals of Object Oriented Design and Development. I have participated in the Informatics Olympiad where I used C++. The tournament first took place on the college level, then on the city and finally on the country level in Georgia.

Javascript

Experience: 12 years

I have developed multiple open source applications with javascript. One of the most popular applications was in 2009-2010 and it was a Keyboard driver to convert input characters into Georgian language. Thousands of websites and hundreds of mobile applications still use this tool. I have a variety of experience with frameworks like Angular JS, Vue JS, jQuery, Ionic etc. and of course node.js

PHP

Experience: 14 years

This is the language that I have used to build most of the applications. This experience includes developing command line applications, frameworks, open source or commercial projects. Currently there are more than thousand websites using PHP applications developed by me.

Python

Experience: 2 years

Second most favorite language after PHP, I have done various backend application using the language, including server monitoring, orchestration and data manipulation.

HTML 4 / 5, CSS 2 / 3

Experience: 14 years

I have been using these two of the core technologies for building Web pages over the years. I utilize multiple types of HTML templating systems or css preprocessor applications like {less}, Sass and Scss.

JBase, MySQL, PostgreSQL, SQLite

Experience: 14 years

I was introduced to databases at college and since then I have been successfully using them with many backend programming languages. This experience includes designing well structured architecture, query optimization and database administration.

NoSQL Database

Experience: 8 years

I have been using various NoSQL databases like Redis, Memcache, MongoDB, CouchDB, Sphinx, Apache Cassandra, Aerospike to optimize enterprise software for high performance.

Server and Network Administration

Experience: 4 years

I have profound experience in setting up operations projects related to automating the deployment of various special purpose servers (NGINX and Apache web servers, database servers, etc.) along with designing enterprise level network topology.

Other Technical Skills and Software

iOS/Android development, Git, Subversion, Microsoft Office, Adobe Photoshop, Autodesk 3ds Max, Window/Mac/Linux Server and Desktop Systems, Experience setting up various autoscaling clusters like Kubernetes and Cassandra on Cloud systems.
